

Comprehending Charlotte: Urban Complexities and the Future of Development in a New South City

April 29, 2022 9:00 A.M. - 3:30 P.M.

The Dubois Center at UNC Charlotte

320 E 9th St, Charlotte, NC 28202

Charlotte has experienced tremendous growth in the last forty years. This growth has been so remarkable that politicians, city planners, and the voting public have decided that it needs to be directed. This direction has taken the form of the "2040 Comprehensive Plan," a "long-range plan that will guide the development of, and the investments made in, our city over the next two decades." **Comprehending Charlotte** will examine America's urban development history in order to inform best directions for Charlotte's future.

Three nationally renowned thinkers and practitioners will speak on the following topics: Green Growth in the City; People on the Move: Mobility, Transportation, and Class; and The Power of Real Estate: Capitalism, Segregation, and Gentrification. Local expert panelists will join them for discussion followed by Q&A with the audience. This event is free and open to the public. For more information, and to register, please scan the QR codes below or click the links.
