The following definitions apply to the questions in this section:

CIP code: The Classification of Instructional Programs (CIP) was created by the U.S. Department of Education to track programs and fields of study. The format of the code is xx.xxxx. CIP codes for architecture are available here.

Name of academic unit: The name of the department, program, or school in which the program is housed.

Additional location: Additional locations include branch campuses, additional sites as part of a single accredited program, teaching site and study abroad as part of a single accredited program, and online learning as part of a single accredited program. These location categories are defined in the   2020 Procedures . Programs initiating or altering additional sites, teaching sites, or online learning must provide this information in the program Annual Report when the changes are made or considered.

Program Administrator: The faculty administrator with direct oversight of the program (e.g. program director).

Academic Unit Administrator: The faculty administrator with oversight of the academic unit housing the program (e.g. department chair, school director).

6. Faculty to student ratio in professional studies courses:

Definition: Professional studies courses are those with architectural content required of all students in the NAAB-accredited program and are the core of a professional degree program that leads to licensure. Knowledge from these courses is used to satisfy Condition 3-Program and Student Criteria.

Faculty-to-student ratios are calculated as the total number of full-time-equivalent faculty teaching the total number of full-time-equivalent students enrolled in the program (for program faculty to student ratio) or in the classes (such as professional courses).

The ratio for professional studies courses should include all courses in the program, including studio courses. The ratio for studio courses is a sub-set of professional studies courses.

The ratio is 1 (faculty): X (number of students). Enter only the number of students. If the ratio is 1 faculty member to 21 students, enter 21.

Total retention rate in program (B÷A):

96.23

2. Graduation rate by track

Definitions: Advertised program length is the amount of time necessary for a student to complete all requirements for a degree or certificate, according to the institution s catalog.

The graduation rate should be calculated separately for each track if tracks have different advertised program lengths. *Programs should work backward from the reporting year to identify the entering semester of the cohort graduating at 150% of the advertised program length at the end of the reporting year. For this same cohort, the graduation rate should also be calculated for students who graduated in 100% of the advertised program length. Programs should not report graduation rate data until a cohort has reached 150% of the advertised program length. At that time, the program will report the graduation rate for students from the entering cohort who graduated in 100% and 150% of the advertised program length.*

For example, in a two-year track, students graduating in 100% of program length would have graduated in two years and students graduating in 150% of advertised program length would have graduated in three years. Therefore, subtract three years from the reporting year to find the entering cohort for the graduation rate question.

To calculate 150% of program length, multiply the advertised program length by 1.5. If this results in a decimal, round up. For example, students graduating in 150% of the advertised program length for a five-year program would graduate within eight years (5 X 1.5 = 7.5, round to 8 years).

Example: Fifty (50) students entered a two-year program in fall 2021 (2021-2022 academic year). 25 (50%) of those students graduated in two years, in 2024 (100% of program length). An additional 15 students graduated in 2025 (150% of program length), bringing the graduation rate to 80%.

Click "Add" to report on each track.

Job Placement

Instructions: Job placement numbers should reflect students who graduated any time in the prior academic year (the year before the current reporting year) regardless of what track or entering cohort they belonged to. If the program did not have graduates in the previous year, enter "0" and explain in the comment space. Include each graduate in only one of the categories so that the total equals the total number of graduates.

Total number of students who graduated from the program in the previous calendar year (2022-2023):

Number of those students who reported their employment status to the program:

34

Number of those students who reported their employment status to the program that are employed in a position related to architecture:

Number of those students still seeking employment:

Number of those students who will be continuing in higher education:

3. Comments regarding Section 6 (optional):

For 6-2, Since we do not have student survey data of recent Architecture graduates, we used an outside vendor (that the University contracts with) to get the current employment status of students. Of the 50 people that graduated, 34 had records of employment (the other 16 were not reported/matched for various reasons). The vendor with the employment data matches the

employed type of work to the degree earned to see if they are employed in or out of the field. If the vendor is unable to determine the type of work the employer does, it will show up as "Other". There were 2 students in this scenario, so we added them to the "employed but not in a position related to architecture" so that everything adds up.
